the best PEOPLE
a superior PROCESS
an exclusive PRODUCT

An Innovative Way to a Classic Window

Time and time again, we've proved that there is no replacement window company in the world like Renewal by Andersen. **By working with the best people, utilizing a superior process, and installing exclusive products**, not only do we provide solutions for new windows, we provide solutions for your new windows. That's our Signature Service.

From consultation to installation, Renewal by Andersen offers single-company accountability without sacrificing the expertise of a local business. Our integrated approach means **we're stronger than any lone manufacturer, contractor, or distributor**. Although we are a national brand, our customers are served by our local retailers in their area, whose regional knowledge – from architecture to building codes – **serves our customers like no other company in the industry**.

More 5 Star Reviews
Than Other Leading Full-Service Window Replacement Companies*

★★★★★ - REVIEW

"I'm so pleased with these new windows. They are exactly what I wanted."

FRAN J.
JACKSONVILLE, FL

Ongoing Innovation

From the beginning, the Andersen name has set the industry standard in construction techniques in fenestration, installation, and technological innovations. As the exclusive window replacement division of Andersen Corporation, Renewal by Andersen is proud to work with our parent company to continue to advance this legacy of innovation. After years of collaborative research, the Andersen family has over 65 active patents, and counting.

Turn a View into a Venue

With our Coastal Impact windows and doors, you can bring the beauty of the outdoors into your home – but without the discomforts of wind, weather, heat, and humidity. Blend the unique interior of your home with the natural beauty outside into one seamless living space, from fireside to seaside.

Create a whole new space simply by combining the indoors and outdoors

SEE MORE OF YOUR WORLD
Enjoy expansive views, refreshing breezes, and comfort in all seasons.

A Legacy of Innovation

As a division of Andersen Corporation, we have over a century of product development at our fingertips. Andersen got its start by manufacturing the first standard window frame kits, saving builders across a booming nation both time and money. Since then, the company has only gone forward and upward. At Renewal by Andersen, we're always seeking feedback from our customers to make sure we're on the right track. Our Coastal Impact windows are the culmination of hard work, exhaustive testing, and continuous improvements. We're proud to offer homeowners in coastal regions the results of our innovation.

FUNCTIONAL REQUIREMENTS:
- Thermal performance
- Water resistance

ENGINEERING SOLUTION:
- Reduce shrinking and expanding with advanced material components
- High-performance seals

HOMEOWNER BENEFIT:
Helps maintain a weathertight seal, even in extreme heat, saving energy.

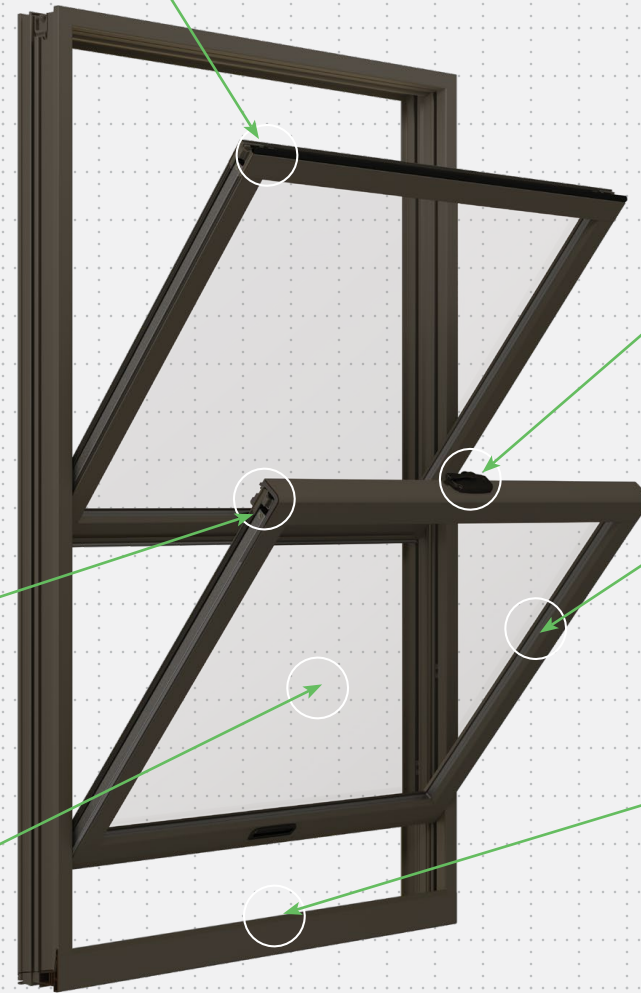

Andersen Stormwatch® protection is available on select patio doors.

Andersen products with Stormwatch® protection are designed and tested to meet the tough building code requirements* in coastal areas. Choose patio doors with style options that are built to stand up to Mother Nature, while offering design flexibility to help make your home one of a kind.

*Tested to AAMA/WDMA/CSA 101 I.S.2/A440-08. Performance values vary by product. View product performance data at www.renewalbyandersen.com/windows-doors/options/coastal-impact. See your local code official for building code requirements in your area.

Designed for Coastal Impact⁵

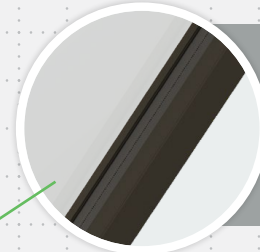

Designed to withstand the harshest weather environments, our Coastal Impact windows are **Certified through the Florida Product Approval program for High Velocity Hurricane Zones (HVHZ) and broader Florida⁵**. Energy efficient, able to resist the effects of salt water and stand up to hurricane-force winds and wind-borne debris⁵, Coastal Impact windows give you peace of mind during rough weather while letting the beauty of the coast shine in.

FUNCTIONAL REQUIREMENTS:
- Access window exterior for cleaning

ENGINEERING SOLUTION:
- A redesigned tilt-latch with integrated mechanisms

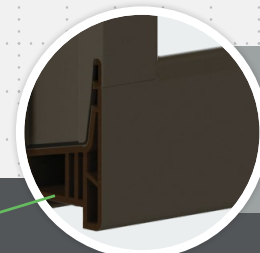

HOMEOWNER BENEFIT:
Easy to clean: Tilt the sash with one hand, wipe with the other.

FUNCTIONAL REQUIREMENTS:
- Long-term durability in coastal environments

ENGINEERING SOLUTION:
- Reclaimed wood fibers blended with polymer. Color is fused to the material, so it never needs painting.

HOMEOWNER BENEFIT:
Stronger, sleeker, Fibrex® material frames mean more glass – and more view.

FUNCTIONAL REQUIREMENTS:
- Meet water infiltration DP requirements

ENGINEERING SOLUTION:
- Build a sill with more precise tolerances that hugs frame

HOMEOWNER BENEFIT:
Superior protection from water infiltration while retaining a beautiful appearance.

FUNCTIONAL REQUIREMENTS:
- Impact-resistant construction
- Meets highest forced-entry rating

ENGINEERING SOLUTION:
- Impact-resistant formulation of Fibrex® material and componentry

HOMEOWNER BENEFIT:
Durable construction makes it ready to take on hurricane-force winds and debris⁴.

FUNCTIONAL REQUIREMENTS:
- Impact-resistant glass

ENGINEERING SOLUTION:
- Patent-pending, laminated, dual-pane design

HOMEOWNER BENEFIT:
Helps protect home from high winds, debris, and possible damage.

TESTED IN SOME OF THE
HARSHTEST CLIMATES

Arizona, Florida, and Minnesota

Coastal History

1992

Hurricane Andrew hit South Florida, industry pushed for building code changes.

1997

North Carolina mandates increased design pressure performance for windows and doors, Andersen introduces Perma-Shield® Narroline® windows and Perma-Shield gliding patio doors with DP upgrade options.

1996

South Florida building codes mandate wind-borne debris protection for windows and doors.

1999

Andersen introduces subset of 400 Series products with monolithic impact-resistant glass and higher design pressures certified through Miami-Dade County.

Today

Andersen has been a leader in impact-resistant windows for nearly 25 years, providing builders, dealers and architects with high-performing products that meet strict coastal building code requirements.

OVER
117
YEARS
of
Innovation
and
Excellence

Feel secure and well protected
in your coastal home.

Added Security for Peace of Mind

Renewal by Andersen's Coastal Impact windows have been designed, tested, and meet the highest grade of forced-entry resistance⁶. This strong performance indicates that these windows can help deter break-in attempts at your home.

**MEETS THE HIGHEST GRADE
OF FORCED-ENTRY RESISTANCE⁶**

⁶Renewal by Andersen® windows are tested in accordance with test standard ASTM F588 at a performance grade forty (40).

Lasting Beauty

Beyond protection against some of the worst weather, our Coastal Impact windows also offer a great defense against heat and UV rays.

These durable windows are made of Fibrex® material, an Andersen-exclusive composite that combines the strength and stability of wood with the low-maintenance features of vinyl, and are available in a range of colors. Coastal Impact windows will help your home stay cooler in the summer and warmer in the winter, all while helping you save money on energy bills. **Protection from UV light means less fading** – on your windows, furniture, carpet, and curtains.

Our selection of glass options help control heating and cooling costs.

Rot and corrosion from salt water

FIBREX® MATERIAL WILL NOT CRACK, PIT, CORRODE, OR ROT¹

FIBREX® MATERIAL ENDURES EXTREME HEAT

• Window Material (Fibrex® material):

We offer a wide range of interior and exterior colors, including popular dark colors such as dark bronze and black. Our colors are formulated to take the sun's rays while retaining their beauty, year after year¹

- **Glass Options:** Our glass is made to let natural light in, but help keep damaging UV rays out, protecting the interior of your home from fade.

Framing Material Makes the Difference

Our Fibrex® material composite insulates about 700 times better than aluminum and has excellent insulating properties on par with wood, vinyl, or fiberglass. This low-maintenance composite **expands and contracts very little, even with extreme temperature swings**. This means that homeowners can select dark exterior colors, as **Fibrex material can “take the heat” up to 150° F**. And Fibrex material **will not crack, pit, corrode, or rot¹**, helping to keep your home secure from the ravages of humidity, termites, and salt water.

Low maintenance inside and out - Coastal Impact Windows

PROTECTION FROM UV LIGHT MEANS LESS FADING

Historical Solutions for Every Home

Whether your home is nine years old or 109 years old, Renewal by Andersen's objective is to maintain its architectural integrity. We want your new windows to look original to your home, not like replacement windows. Our Coastal Impact windows are available in custom sizes, with custom grille options, and a wide range of exterior colors and interior finish options. Many communities along the coast have specific historic districts that follow detailed guidelines established by the Landmark Preservation Commissions and Architectural Review Committees. We work with you to help navigate the many requirements of these organizations.

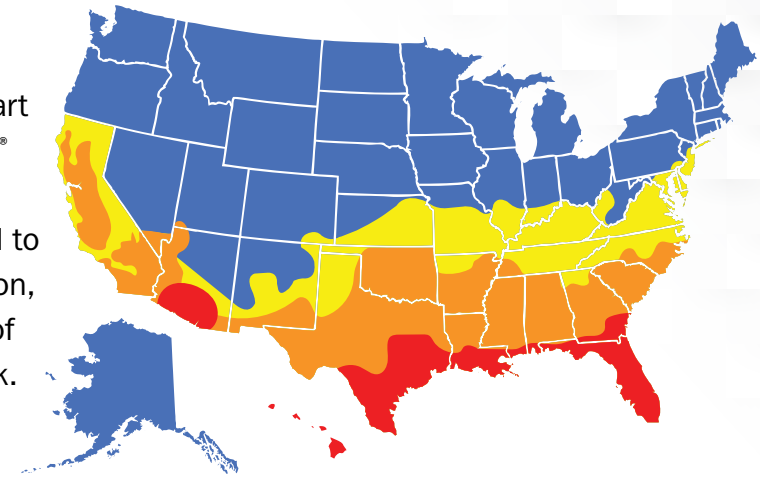

← Helps decrease light sources that can disorient young sea turtles

Turtle Glass

Our commitment to environmental sustainability extends outside your home. Our Coastal Impact windows feature High-Performance Low-E4[®] Sun impact-resistant Monolithic Gray glass, which satisfies the Florida Turtle Code and helps decrease light sources that can disorient young sea turtles.

Energy Efficiency

An energy-efficient window is more than the sum of its parts. Renewal by Andersen, as part of Andersen, earned the 2021 ENERGY STAR[®] Partner of the Year – Sustained Excellence award. We at Renewal by Andersen are proud to offer products that reduce energy consumption, and have minimal environmental impact. All of this can help the planet AND your pocketbook.

Comfort and Temperature

Whether it's the location, the architectural style, or the family who lives there, every home is unique. The same goes for that home's energy bill. At Renewal by Andersen, we'll help you sort through the details of glass heating and cooling performance, visible light transmittance, and ultraviolet (UV) protection to pinpoint the right window glass for you. With customers across the nation and a glass solution for every climate, our windows take advantage of the newest technologies to help lower energy costs and keep your family comfortable.

Fibrex® Composite Material, an Andersen Exclusive

In 1992, Andersen perfected and patented Fibrex® composite material technology. A composite using real wood fiber, Fibrex material is strong enough to stand up to the harshest wind and weather. Our Coastal Impact windows use narrower frames and sashes, increasing the glass area and expanding your view to outdoor beauty. And because Fibrex material has superior thermal insulating properties, your home stays cooler in the warm months.

LONG-TERM DURABILITY WITH NO SAGGING OR WARPING

Laurie March, host and creative force behind The House Counselor on hgtvremodels.com⁸

MY REPLACEMENT PROJECT LAURIE MARCH

“When it came time to replace some of my most sun-damaged windows and doors, I wanted substantial, beautiful work that looked original to my 1927 home. And because Renewal by Andersen’s offering of patio doors are custom built, the team didn’t have to mess much with my home’s stucco, which was such a relief. The door completely changed how the room feels. It’s far more quiet, no dust gets in through the cracks, and the late afternoon sun no longer blasts heat into the dining room. The change in noise is something I wasn’t prepared for – and living in the city, it was a very welcome surprise.”

At Renewal by Andersen, we take pride in the outstanding people, exclusive products, and unique process that make our Signature Service the best in the industry. All we want is for you to be happy. Fortunately, we’re on the right track. In more than 95,000 Renewal by Andersen customer satisfaction surveys, our performance averages 4.7 out of 5 stars. That means over 94 percent of homeowners are very happy with the entirety of the replacement process. And we can only push ourselves forward from here.

What are Renewal by Andersen® windows made of?

Every window that leaves our facility with your name on it is built from our exclusive Fibrex material, a unique composite made from reclaimed wood fiber blended with a polymer. This gives your windows the strength, beauty, and durability of wood, as well as the low-maintenance features of vinyl.

20 Years and Counting

We tested the performance of 20-year-old Renewal by Andersen windows in real homes. Even after years of continuous exposure to harsh winters and humid summers, all easily passed our quality tests⁷. Warrantied not to flake, rust, blister, peel, crack, pit, or corrode¹, Fibrex material is simply a superior material to build a window from.

Color Choice

Our unique process fuses color to Fibrex material during manufacturing – including dark exteriors unavailable with most vinyl windows – creating long-lasting beauty with no need to paint or stain.

Greater Comfort

Fibrex material is nearly 700 times more effective at blocking thermal transfer than aluminum, helping protect your family from the elements and your wallet from high energy bills.

Exceptional Beauty

Windows made with Fibrex material maintain their shape and structural integrity without warping, sagging, or cracking¹.

Innovative Materials

Fibrex material is twice as strong as vinyl – weathertight seals stay weathertight.
